EDUCATION

University Of Colorado Boulder

Master of Science in Data Science

Aug 2024 – May 2026

Colorado, USA

PES University

Bachelor of Technology, Computer Science and Engineering

Aug 2018 – May 2022

Bangalore, India

TECHNICAL SKILLS

Programming Language: Python, Pyspark, Scala, SQL, R, Java

Technologies: Google Cloud Platform(Datapro, Composer, Compute Engine, Spanner, Cloud SQL), Amazon Web Services(S3, EC2, Glue, Lambda), Power BI, MS Excel, MS Word, PowerPoint, GitLab

Technical Skills: ETL, Data Analysis, Machine Learning, Oracle, Spark, Data Preparation, Systems Engineering, Software Methodology, Data Visualization, Data Warehousing, Data Modeling, Data Architecture, Data Manipulation

Soft Skills: Optimization Techniques, Problem-Solving, Documentation, Time Management, Collaboration

Certification : Google Cloud Associate Cloud Engineer

EXPERIENCE

Data Engineer - Full time

ZEE Entertainment Enterprises Limited

Jul 2022 – Jul 2024

Bengaluru, India

- Executed an efficient migration process for legacy **Spark** applications into **Big Query SQL**, driving down expenses by 25% while enhancing runtime efficiency of up to 20%.
- Engineered an **ETL** Data pipelines utilizing Spark for integrating diverse databases such as MySQL, MSSQL, and PostgreSQL; maintained data integrity which resulted in achieving 99% overall accuracy.
- Provisioned Google Cloud and data infrastructure for various components including Storage, BigQuery tables, and Apache Airflow using **Terraform**; enforced service account level bindings across 5 project environments.
- Extracted and processed **13TB** of data from **DynamoDB**. Orchestrated a cost-effective **Data migration** to **ScyllaDB** using **EMR** and **Spark**, reducing costs by 30%.
- Led ETL pipeline development using **Apache Airflow** to automate data transfer from 35 **APIs** to BigQuery. Created and published **Tableau reports** for the **HR team**. Formatted reports with HTML and CSS for email distribution.
- Developed automated solutions using **cloud functions** for real-time execution of **Python scripts** based on specific events, enhancing report generation efficiency while minimizing manual efforts by an impressive 80%.

Data Engineering Intern

ZEE Entertainment Enterprises Limited

Jan 2022 – Jun 2022

Bengaluru, India

- Designed and executed a data pipeline on **AWS**, employing **SHA256 encryption** to store ZEE5 users **PII** data in **MSSQL** securely and implemented NON PII data flattening and orchestrated seamless migration to AWS **Athena**.
- Constructed a SAR pipeline in **Spark**, analyzing user activity patterns that identified strategies for reducing digital customer churn by 15% within one year for business process analysis.
- Engaged closely with cross-functional teams including data scientists and business analysts to fulfill an average of 40 ad hoc data and reporting tasks for Core business processes.

Intern

Nsmiles Private Limited

Feb 2021 – Aug 2021

Bengaluru, India

- Created an interactive chatbot leveraging the **RASA NLU** framework that streamlined user interactions, increasing data collection efficiency by reducing manual input time from users by approximately 20 hours per week.
- Presented the **research paper** AI-Based Career Counselling with Chatbots at the **5th International Conference** on Intelligent Sustainable Systems by Springer.

PROJECTS

NewYork Airbnb Data Analytics and Prediction

- Conducted exploratory **data analysis** and leveraged innovative **visualization** methods; identified critical trends that facilitated more effective development of predictive models, enhancing target variable forecasting by 20%.

Identity Verification through Facial Recognition

- Implemented **dlib's face recognition** algorithm utilizing **deep learning** techniques, achieving a remarkable accuracy of 99.38% on the Labeled Faces in the Wild benchmark while processing over 1000 images.
